Sverdlovsk (56°50' N/ 60°45' E)	1947 to June 1949	25X1X [redacted]	1. Barracks (wooden canton- ment buildings)	SE city exit, on NE side of Sibirsky T Trakt (see reference No 1 on Annex 2)	Tank unit 34 tanks ob- served		[redacted] observed several three-story wooden barracks at the SE edge of the city in mid-1948. T34 tanks and tanks of another type were seen entering and leaving the barracks area.
			2. Barracks (two brick buildings)	Some 100 meters SE of the Tank Barracks on the same side of road (see reference No 2 on Annex 2)	Referred to as Drivers' Barracks. Many trucks in the barracks area.		
			3. Barracks (large brick building)	Several kilometers SE of Drivers' Bar- racks, on SW side of same road, north of the military airfield (see reference No 3 on An- nex 2)	AAA unit. Ten canvas-covered AA guns were emplac- ed on a long, partly wooded hill about 1 km SW of the bar- racks. Tents were beside the emplac- ements.		
	1946 to April 1949	25X1X [redacted]	1. Barracks (two four-story brick buildings, two wooden gara- ges, old instal- lation)	About 10 km SSE of the city, at northern en- trance. Village of Nizhne Isetski, on wes- tern side of road (see reference No 4 on Annex 2)	a. T34 and lighter tanks, mainly in garages. b. Two 172-mm guns, field howitzers, light mortars and light and heavy AA guns were ob- served in the area of the barracks

2. Tank repair shop (old, 120x80-meter brick building)
East of Nizhne Isetski, near the Khimursk plant (see reference No 5 on Annex 2)

Troops wearing blue caps with red bands and red epaulets bearing the number 437 were observed at the guns (The same troops were also seen in the Khimursk plant)

Repair of tanks coming from the above-mentioned barracks. The shop was operated by about 200 troops. Each tank coming in for repair was accompanied by its driver and gunner. Tanks of the following types were repaired: T34 (with a 76.2-mm gun, without muzzle brake) T70 (designation on brass nomenclature plate on cylinder-head cover) with a 47-mm gun, without muzzle brake, and a light machine gun) JS (with a 122-mm gun, with muzzle brake, two machine guns and an AA machine gun on the turret; only two JS tanks seen). The JS tanks differed from JS tanks observed in 1944 in the following features: a. Front armor reinforced by a 60-mm armor plate welded on with 2-mm inter-space, thus bringing the front armor up to 160 mm. (This work was done in the repair shop) b. Hatch, 50x50 cm, in the center of the bottom of the hull. (Observed for the first time)

3. Tank training area
